Update Guide

This Guide provides instructions for updating firmware with a USB flash drive on the following products.

- YAS-408

- ATS-4080*

- YMS-4080*
  * Sold only in certain countries or regions

See product pages on the Yamaha website for details regarding the issues resolved, and functions added, by updating firmware.

Equipment required for firmware update

Prepare the following items before attempting to update firmware.

- USB flash drive
  Use a USB flash drive that meets all of the following requirements.
  – Supports the USB mass storage device class
  – Formatted in FAT16 or FAT32 format
  – No encryption applied
  – No data stored on the device (empty)

- Computer that can be connected to the Internet
  Download the firmware from the Yamaha website.

Preparing the firmware

1 **Download the latest version of firmware from the Yamaha website to a computer.**

See product pages on the Yamaha website for more information.

2 **Decompress the downloaded file and save the firmware data file to the USB flash drive.**

Be sure to save the firmware data file in the top folder (root folder) of the USB flash drive.

Do not change the file name when saving it. File names are as follows:

- YAS-408: 000450-xxxx.bin
- ATS-4080: 000652-xxxx.bin
- YMS-4080: 000451-xxxx.bin

"xxxx" is a set of pre-determined alphanumeric characters.
Updating the unit's firmware

1 **Turn off the unit.**

2 **Unplug the power cable from the AC wall outlet.**

3 **Connect the USB flash drive to the UPDATE ONLY jack on the unit.**

YAS-408
ATS-4080
YMS-4080

USB flash drive containing the firmware data file

UPDATE ONLY

**4** **Plug the power cable into an AC wall outlet.**

5 **Touch and hold** 🔉 **and** ⏻ **together for at least 3 seconds.**

CONNECT

The firmware update begins. The indicators will glow as shown below while the firmware is being updated.

| HDMI | TV | ANALOG | BLUETOOTH NET | SURROUND | 📶 | ✴ |

Running display (glow in succession)   Glows

The indicators will flash as shown below when the firmware update has been successfully completed.

| HDMI | TV | ANALOG | BLUETOOTH NET | SURROUND | 📶 | ✴ |

Flash

If indicators flash differently than shown above, or fail to glow or flash at all, see "Troubleshooting" (p. 5 and 6).

6 Touch ⏻ when the firmware update is complete.

The unit will turn off.

7 Disconnect the USB flash drive.
The firmware update has been completed.

Troubleshooting

If the firmware update fails, the indicators will flash as illustrated below. Confirm the problem and try updating the firmware again.
Flashing (red) indicator

Flashes (red)
